

## **Order Picker License Prince George**

Order Picker License Prince George - Order preparation operation or also called order picking as it is more commonly known is a method utilized within warehouse operations and consists of employees referred to as order pickers. The order picker's duty is to collect and take articles in specific quantities to accomplish the customer's orders previous to shipment. Order picking is an easy warehousing method. The effectiveness in which this task is completed can be directly linked to a supply chain's productivity. Hence, order picking is among the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are certain kinds of order picking which comprise: pick to box method, wave picking method, picker to part method or piece picking, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the things from his or her station. The box then moves to other picking locations until the client order is finish. In this particular process, there is no movement of the order picker personnel. In the wave picking method, the order pickers move all-around so as to collect the required items for several orders. The piece picking or picker to part method is similar where the order picker or pickers move in order to collect the stuff required but for one order only.

In the sorting systems method, there is no movement of the order picking employees. Instead, the products are brought to him or her by means of an automated system such as automatic storage or a conveyor system. In the zone picking method, each order picker is assigned to one particular zone. They are responsible for only realizing order picking in this specified zone.
